

Electricity Advisor

In Home Display and Emerald App

The Electricity Advisor creates energy-aware homes by connecting to the home's smart electricity meter and sending data directly to the Emerald App to track and report real-time electricity usage.

Connected to a smart electricity meter, the Electricity Advisor delivers instant insights, highlighting peak times and usage trends in easy-to-read data and graphs. With features like a smart energy budget for setting goals and managing usage targets, and detailed weekly reports, the Electricity Advisor empowers households to reduce energy costs while staying informed about their electricity consumption.

Features

- Monitor electricity usage in real-time.
- Compatible with Emerald App.
- Easily connects to smart meters through customisable sensor housings.
- In-app weekly energy usage reports.
- FUV rated to withstand extreme weather conditions.
- 7Yr+ battery lifetime.
- 5 Years product warranty.

Specifications
